

# x950 Series

# Expandable 10G/40G/100G stackable L3+ switches

Allied Telesis x950 Series switches are ideal for the modern enterprise network core, where stacking creates a resilient local or distributed solution. These powerful switches support 100 Gigabit connectivity, and provide the capacity that today's Smart City and IoT networks need.

x950 Series switches feature a highperforming 1.92 Terabit fabric, to eliminate bottlenecks and effortlessly forward all traffic.

x950 switches feature either 24 x 1/10 Gigabit SFP+ ports or 24 x 1/2.5/5/10 Gigabit copper ports to enable flexible deployment, while 4 x built-in 40G/100G ports provide high-speed backbone connectivity. With an expansion (XEM) bay, plus the ability to stack multiple units, extra capacity can be seamlessly added for a future-proof network.

## **Smart City and IoT networks**

Large switching and routing tables support Smart City networks and the Internet of Things (IoT). The x950 Series meets the increasing demand for the convergence of multiple services.

# **Network automation**

Allied Telesis Autonomous Management Framework™ (AMF) meets the increasing management requirements of modern converged networks, by automating many everyday tasks. AMF has powerful features that allow an entire network to be easily managed as a single virtual device.

Vista Manager™ EX is an intuitive graphical tool for monitoring and managing AMF wired and Autonomous Wave Control (AWC) wireless devices. Full visibility and powerful features enable proactive management of large networks.

# Device and network management

The Device GUI on the x950 Series enables graphical monitoring of key switch features to support easy management.

Integrated into the Device GUI, Vista Manager mini supports visibility and management of AMF wired and AWC wireless network devices, making it ideal as a one-stop solution for small to medium-sized networks.

AWC is an intelligent, easy to use Wireless LAN controller that

automatically maintains optimal wireless coverage. Vista Manager mini includes AWC floor and heat maps showing wireless coverage. It also supports AWC Channel Blanket hybrid operation, providing maximum performance and seamless roaming.

#### Secure

The x950 Series is packed with advanced security features to protect the network—from the edge to the core. This includes powerful control over network traffic types and protection against attacks.

AMF enables secure management without additional complexity.

#### Resilient

The convergence of network services has led to increasing demand for highly-available networks with minimal downtime. Virtual Chassis Stacking (VCStack™), in conjunction with link aggregation, provides a network with no single point of failure, and a resilient solution for high-availability applications. The x950 Series can form a VCStack of up to eight units, at any port speed, for enhanced resiliency and simplified management. With VCStack over Long Distance (VCStack LD), stacks can also be created over long distance fiber links, making it the perfect choice for distributed environments too.

Allied Telesis Ethernet Protection Switched Ring (EPSRing™) and the standards-based G.8032 Ethernet Ring Protection, ensure that distributed network segments have high-speed, resilient access to online resources and applications.

## Reliable

Designed with reliability in mind, the x950 Series guarantees the continual delivery of essential services. Hot-swappable components, such as XEMs, fans and load-sharing power supplies, pair with near-hitless online stack reconfiguration to ensure that

# **Key Features**

- ▶ High capacity, with 4 x QSFP+/ QSFP28 slots supporting 40G or 100G connectivity
- ▶ 10G, 40G, 100G XEMs
- ► Multi-speed (1/2.5/5/10G) XEMs
- ► Allied Telesis Autonomous Management Framework<sup>™</sup> (AMF)
- ► Large switching and routing tables support Smart City and IoT networks
- VCStack<sup>™</sup> 8 units at any port speed with flexi-stacking
- VCStack LD for long distance stacking
- ► EPSRing<sup>TM</sup> and G.8032 ERPS for resilient rings
- ► Active Fiber Monitoring (AFM) for fiber data and stacking links
- Device GUI for web-based management
- Media Access Control Security (MACSec)
- ▶ Modbus support
- ► AT-Vista Manager mini enables:
  - Wired and wireless network visibility
  - AWC wireless network management
  - AWC-Channel Blanket hybrid wireless

maintenance doesn't affect network uptime.

# **Environmentally friendly**

The x950 Series supports Energy Efficient Ethernet (EEE), automatically reducing the power consumed by the switch whenever there is no traffic on a port, reducing operating costs.

# **Key Features**

### Vista Manager mini

▶ Integrated into the Device GUI, Vista Manager mini provides full network visibility of AMF and AWC devices. Support optimal wireless performance from AWC hybrid operation with maximum throughout and a seamless Wi-Fi user experience.

# Autonomous Management Framework™ (AMF)

- ▶ AMF is a sophisticated suite of management tools that provide a simplified approach to network management. Common tasks are automated or made so simple that the everyday running of a network can be achieved without the need for highly-trained, and expensive, network engineers. Powerful features like centralized management, auto-backup, auto-upgrade, auto-provisioning and auto-recovery enable plug-and-play networking and zero-touch management.
- ➤ The x950 Series can operate as the AMF network master, storing firmware and configuration backups for all other network nodes. The AMF master enables auto-provisioning and auto-upgrade by providing appropriate files to new network members.
- ▶ AMF Guestnode allows Allied Telesis wireless access points and further switching products, as well as third party devices such as IP phones and security cameras, to be part of an AMF network.
- The x950 Series provide a single-pane-of-glass interface to the entire network. Administrators can view the AMF topology map using the intuitive Device GUI.

#### **AWC Wireless Management**

- Optimize wireless network performance with the Autonomous Wave Controller (AWC), built-in to the x950 Series. AWC analyzes wireless traffic patterns and automatically reconfigures access points to meet demand.
- Wireless network operation in multi-channel, single-channel (Channel Blanket), and hybrid (multichannel and Channel Blanket) modes, supports maximum data throughput and seamless roaming for the most flexible wireless solution available.

# **Large Network Tables**

High-capacity 1.92 Terabit fabric and 1,190Mpps packet forwarding provide powerful data transfer capability, supporting large campus networks as well as Smart City and IoT solutions. Large MAC and IP host tables are ready for the increasing number of connected devices found in modern enterprise and city-wide networks.

# **Multi-Speed Ports**

Copper ports on the x950-28XTQm, XEM2-12XTm and XEM2-8XSTm expansion modules support 2.5 and 5 Gigabit connectivity to enable high-speed wireless, or maximum downlink speed using legacy Cat5E/6 cabling.

# VCStack™

Create a VCStack of up to eight units at any port speed. Stacking links are connected in a ring so each device has dual connections to further improve resiliency. VCStack provides a highly available system where network resources are spread out across stacked units, reducing the impact if one of the units fails. Aggregating switch ports on different units across the stack provides excellent network resiliency.

#### VCStack LD

 Long-distance stacking allows a VCStack to be created over fiber links to span longer distances, perfect for a distributed network environment.

#### **EPSRing™**

- EPSRing allows several switches to form protected rings with 50ms failover—perfect for high performance at the core of Enterprise or Provider Access networks.
- SuperLoop Protection enables a link between two EPSR nodes to be in separate EPSR domains, improving redundancy and network fault resiliency.

#### G.8032 Ethernet Ring Protection

- G.8032 provides standards-based high-speed ring protection, that can be deployed stand-alone, or interoperate with Allied Telesis EPSR.
- Ethernet Connectivity Fault Monitoring (CFM) proactively monitors links and VLANs, and provides alerts when a fault is detected.

#### **Premium Software License**

▶ By default, the x950 Series offers a comprehensive Layer 2 and standard Layer 3 feature set. The feature set can easily be elevated to full Layer 3 by applying the premium software license. This adds increased dynamic routing protocols and Layer 3 multicasting capabilities.

#### **Active Fiber Monitoring (AFM)**

▶ AFM prevents eavesdropping on fiber communications by monitoring received optical power. If an intrusion is detected, the link can be automatically shut down, or an operator alert can be sent. Active Fiber Monitoring is supported on fiber data and fiber stacking links.

# Quality of Service (QoS)

▶ Comprehensive low-latency wire-speed QoS provides flow-based traffic management with full classification, prioritization, traffic shaping and min/max bandwidth profiles. Enjoy boosted network performance and guaranteed delivery of business-critical Ethernet services and applications. Time-critical services like voice and video applications take precedence over non-essential services like file downloads, maintaining responsiveness of Enterprise applications.

#### sFlow

sFlow is an industry standard technology for monitoring high speed switched networks. It provides complete visibility into network use, enabling performance optimization, usage accounting/billing, and defence against security threats. Sampled packets sent to a collector ensure it always has a real-time view of network traffic.

# Software-Defined Networking (SDN)

 OpenFlow is a key technology that enables the use of SDN to build smart applications that unlock value and reduce cost.

#### **AMF Application Proxy**

 Allied Telesis SES (Secure Enterprise SDN) solution enables internal LAN threat detection and automatic end-point isolation to protect the network. The AMF Application Proxy enables the SES controller to communicate with the AMF master when a threat is detected, so the AMF master can take action to block the threat at source by quarantining the infected end-point.

### **TACACS+ Command Authorization**

► Centralize control of which commands may be issued by a specific user of an AlliedWare Plus device. TACACS+ command authorization complements authentication and accounting services for a complete AAA solution.

#### **UniDirectional Link Detection**

UniDirectional Link Detection (UDLD) is useful for monitoring fiber-optic links between two switches that use two single-direction fibers to transmit and receive packets. UDLD prevents traffic from being sent across a bad link by blocking the ports at both ends of the link in the event that either the individual transmitter or receiver for that connection fails.

# Virtual Routing and Forwarding (VRF Lite)

▶ VRF Lite provides Layer 3 network virtualization by dividing a single switch into multiple independent virtual routing domains. With independent routing domains, IP addresses can overlap without causing conflict, allowing multiple customers to have their own secure virtual network within the same physical infrastructure.

# **VLAN ACLs**

Simplify access and traffic control across entire segments of the network. Access Control Lists (ACLs) can be applied to a Virtual LAN (VLAN) as well as a specific port.

#### **VLAN Translation**

- VLAN Translation allows traffic arriving on a VLAN to be mapped to a different VLAN on the outgoing paired interface.
- ▶ In Metro networks, it is common for a network Service Provider (SP) to give each customer their own unique VLAN, yet at the customer location give all customers the same VLAN-ID for tagged packets to use on the wire. SPs can use VLAN Translation to change the tagged packet's VLAN-ID at the customer location to the VLAN-ID for tagged packets to use within the SP's network.
- ➤ This feature is also useful in Enterprise environments where it can be used to merge two networks together, without manually reconfiguring the VLAN numbering scheme. This situation can occur if two companies have merged and the same VLAN-ID is used for two different purposes.

# Modbus

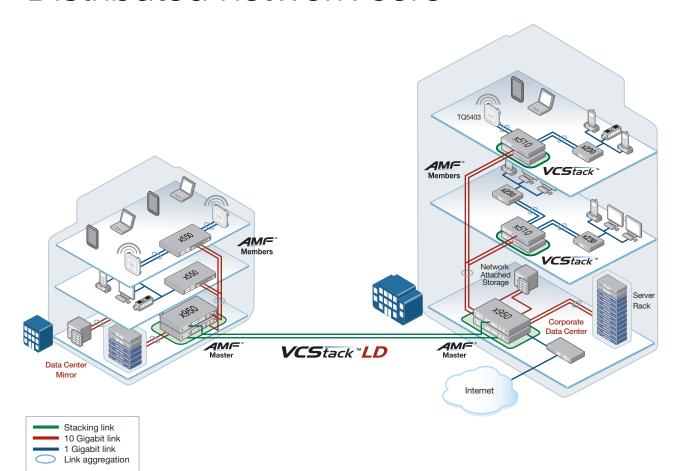

Modbus enables communication with Supervisory Control and Data Acquisition (SCADA) systems for industrial automation.

# Media Access Control Security (MACSec)

802.1AE MACSec secures all traffic on point-topoint Ethernet links between directly connected nodes, ensuring protection against security threats such as denial of service, intrusion, man-in-themiddle, passive wiretapping, and playback attacks.

# **Key Solutions**

# Distributed network core

Today's corporate network users demand a high-performing enterprise network that can seamlessly carry multiple converged services, and provide instant access to online resources and applications. This key solution uses the x950 Series and VCStack LD—ideal for a distributed business network core that provides high availability, increased capacity and ease of management.

Using VCStack at the core of the network allows multiple switches to appear as a single virtual chassis, simplifying management. In normal operation, the full bandwidth of the network is used, and with two x950 switches in each location, there is both device and path resiliency. The x950 series stacks up to eight units at any port speed for flexible deployment—supporting up to four locations with

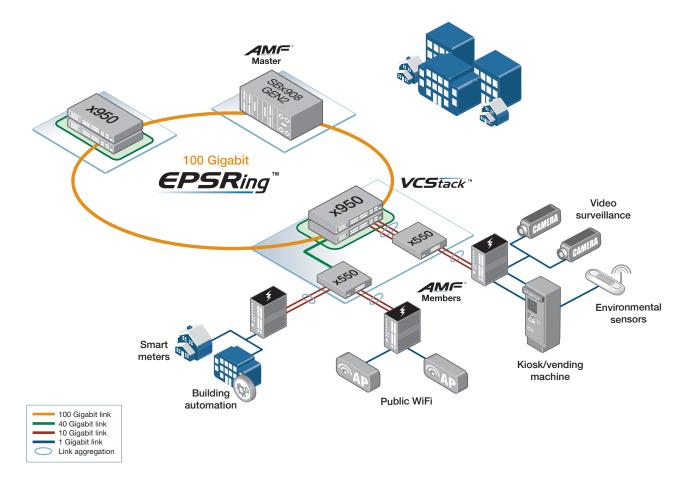

complete resiliency, or up to eight locations with a single switch each.

This powerful solution easily supports all online services, while mirroring of the corporate data center enables automated disaster recovery, to ensure always-available access to digital resources.

AMF allows the entire network to be unified for ease of management. The x950 VCStack acts as the AMF Master, automatically backing up the entire network, and enabling plug-and-play networking with zero-touch expansion and recovery.

# **Key Solutions**

# Smart city network

All over the world, Smart Cities are looking to increase information availability, security and transport efficiency, whilst reducing pollution and waste. Access to real-time data from a variety of sources gives cities the ability to enhance the quality of their urban services, and increase citizen safety.

In this key solution, x950 Series switches, together with the Allied Telesis SwitchBlade x908 Gen2, create the ideal distributed core solution for Smart City and IoT networks. Large switching and routing tables support the many devices that make up modern metropolitan networks, including video surveillance cameras, environmental sensors, information kiosks, public Wi-Fi, building automation and many more.

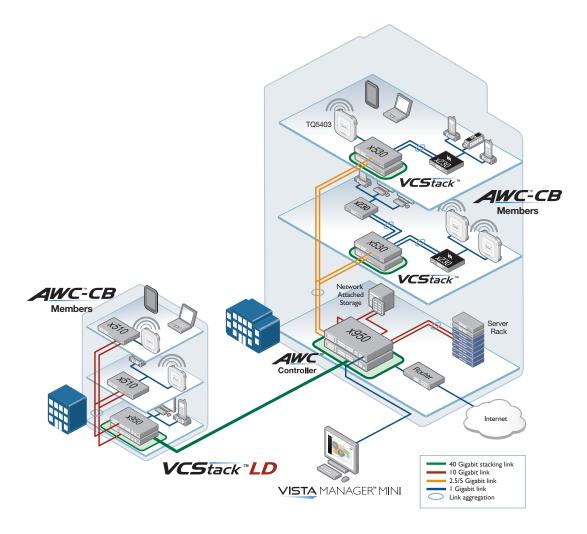

In this Smart City solution, the flexible x950 Series provides 10G, 40G and 100G connectivity. Allied Telesis EPSR creates a high-speed resilient metro ring running at 100Gbps for maximum performance, and extremely fast failover between nodes. EPSR enables rings to recover within as little as 50ms, preventing a node or link failure from impacting the delivery of converged data and video traffic.

AMF automates many day-to-day tasks, backs up the entire network, and provides the ability to configure many or all devices city-wide—with a single command.

The x950 Series and Allied Telesis advanced features enable network managers to deliver leading Smart City services.

# **Key Solutions**

# Integrated wireless LAN management

Allied Telesis Autonomous Wave Control (AWC) offers solutions for two of the most common problems with Wireless LANs: initial setup complexity, and on-going performance degradation. Initial WLAN set-up usually requires a site survey to achieve the best coverage, and performance of WLANs can often change over time as external sources of radio interference reduce coverage and bandwidth. These issues can be time-consuming to identify and resolve.

AWC features an intelligent process that automatically recalibrates the signal strength and radio channel of each Access Point (AP) for optimal WLAN performance. AWC Channel Blanket enables seamless roaming with reliable connection for dynamic environments.

Vista Manager mini is integrated into the Device GUI of the x950 Series and provides an ideal solution for modern enterprise networks, enabling management of both the wired (with AMF) and wireless (with AWC) networks to be automated. This reduces both the time and cost of network administration, as well as maximizing network performance for a superior user experience.

Up to five TQ Series wireless APs can be managed for free, and up to a further 180 APs (max 185) with feature licenses, are available separately.

On some AP models, hybrid channel blanket enables multichannel and single-channel WiFi operation simultaneously. This supports seamless roaming and maximum throughput. Channel Blanket licenses are available for up to 180 APs.

## **Specifications**

PRODUCT	1/2.5/5/10G (RJ-45) COPPER PORTS	1/10 GIGABIT SFP+ PORTS		XEM BAY	SWITCHING Fabric	FORWARDING RATE
x950-28XSQ		24	4*	1	1.92Tbps	1190Mpps
x950-28XTQm	24		4*	1	1.92Tbps	1190Mpps

\*Can also support up to 16 10G ports (using 4 x 10G breakout cables)

#### **Performance**

- Extensive wirespeed traffic classification for ACLs and QoS
- ➤ Supports 10KB Jumbo frame size for data center and server aggregation applications
- ▶ Wirespeed multicasting
- ▶ 96K MAC address entries
- ▶ Up to 96K host entries
- ▶ Up to 8K multicast entries
- ► Up to 128 Link Aggregation Groups (LAGS) any combination of static and dynamic (LACP)
- ▶ 4K VLANs (VCStack of up to 4 units)
- ▶ 2K VLANs (VCStack of 5-8 units)
- ▶ 4GB DDR SDRAM
- ▶ 16MB packet buffer memory
- ▶ 4GB Flash Memory

#### Reliability

- ▶ Modular AlliedWare Plus operating system
- ▶ Dual hot swappable PSUs with 1 + 1 redundancy
- ▶ Dual feed support: a separate power circuit can feed each power supply providing extra reliability
- ► Hot-swappable expansion module (XEM)
- ► Hot-swappable fan modules
- Full environmental monitoring of PSUs, fans, temperature and internal voltages, with SNMP traps to alert network managers in case of any failure

# Expandability

- Support for 4 x 40G or 100G connections built in, and an expansion bay to add further switching capacity
- ▶ Versatile licensing options for additional features

# **Power Characteristics**

- ► AC Voltage: 100 to 240V (+/-10% auto ranging)
- ► Frequency: 47 to 63Hz

# **Diagnostic Tools**

- Active Fiber Monitoring detects tampering on optical links
- ▶ Built-In Self Test (BIST)
- ► Cable fault locator (TDR)
- ► Find-me device locator
- ► Hardware health monitoring
- ► Automatic link flap detection and port shutdown
- ► Optical Digital Diagnostic Monitoring (DDM)
- ▶ Ping polling for IPv4 and IPv6
- ▶ Port mirroring
- ► TraceRoute for IPv4 and IPv6
- ► Uni-Directional Link Detection (UDLD)

#### **IPv4 Features**

- ▶ Black hole routing
- ► Directed broadcast forwarding
- DNS relay
- ► Equal Cost Multi Path (ECMP) routing

- ► Policy-based routing
- ▶ Route maps
- ► Route redistribution (OSPF, BGP, RIP)
- ▶ Static unicast and multicast routing for IPv4
- ► UDP broadcast helper (IP helper)
- ► Up to 64 Virtual Routing and Forwarding (VRF lite) domains (with license)

#### **IPv6 Features**

- ▶ DHCPv6 client and relay
- ► DNSv6 client and relay
- ▶ IPv4 and IPv6 dual stack
- ► IPv6 hardware ACLs
- ► Device management over IPv6 networks with SNMPv6, Telnetv6 and SSHv6
- ► NTPv6 client and server
- ► Static unicast and multicast routing for IPv6
- ► Log to IPv6 hosts with Syslog v6

#### Management

- ➤ 7-segment LED provides at-a-glance status and fault information
- Autonomous Management Framework (AMF) enables powerful centralized management and zero-touch device installation and recovery
- ► Try AMF for free with the built-in Starter license
- Console management port on the front panel for ease of access
- ► Eco-friendly mode allows ports and LEDs to be disabled to save power
- ► Web-based Graphical User Interface (GUI)
- ► Industry-standard CLI with context-sensitive help
- Out-of-band 10/100/1000T Ethernet management port
- ► Powerful CLI scripting engine
- Comprehensive SNMP MIB support for standardsbased device management
- ▶ Built-in text editor
- ► Event-based triggers allow user-defined scripts to be executed upon selected system events
- USB interface allows software release files, configurations and other files to be stored for backup and distribution to other devices

# **Quality of Service**

- 8 priority queues with a hierarchy of high priority queues for real time traffic, and mixed scheduling, for each switch port
- Bandwidth limiting (virtual bandwidth)
   Limit bandwidth per port or per traffic class down to 64kbps
- Wirespeed traffic classification with low latency essential for VoIP and real-time streaming media applications
- ▶ IPv6 QoS support and IPv6-aware storm protection
- ► Policy-based QoS based on VLAN, port, MAC and general packet classifiers
- ► Policy-based storm protection

- Extensive remarking capabilities and taildrop for queue congestion control
- Queue scheduling options for strict priority, weighted round robin or mixed scheduling
- ▶ IP precedence and DiffServ marking based on layer 2, 3 and 4 headers

### **Resiliency Features**

- Control Plane Prioritization (CPP) ensures the CPU always has sufficient bandwidth to process network control traffic
- Dynamic link failover (host attach)
- ► Ethernet Protection Switched Rings (EPSR) with SuperLoop Protection (SLP) and EPSR enhanced recovery for extra resiliency
- ► Flexi-stacking allows the use of any port speed to stack
- ► Long-distance VCStack over fiber (VCStack LD)
- ► Loop protection: loop detection and thrash limiting
- ▶ PVST+ compatibility mode
- ► STP root guard
- ► VCStack fast failover minimizes network disruption

#### Security

- Access Control Lists (ACLs) based on layer 3 and 4 headers
- ► Configurable ACLs for management traffic
- ► Auth fail and guest VLANs
- ► Authentication, Authorisation and Accounting (AAA)
- Bootloader can be password protected for device security
- ► BPDU protection
- ► DHCP snooping, IP source guard and Dynamic ARP Inspection (DAI)
- ► Dynamic VLAN assignment
- ► MAC address filtering and MAC address lock-down
- ► Media Access Control Security (MACSec)
- Network Access Control (NAC) features manage endpoint security
- ► Port-based learn limits (intrusion detection)
- ► Private VLANs provide security and port isolation for multiple customers using the same VLAN
- ► Secure Copy (SCP)
- ► Secure File Transfer Protocol (SFTP) client
- Strong password security and encryption
- ► TACACS+ command authorisation
- ► Tri-authentication: MAC-based, web-based and IFFF 802 1x
- ► Web-based authentication
- ► RADIUS group selection per VLAN or port
- ► RADIUS Proxv

# Software-Defined Networking (SDN)

 OpenFlow v1.3 with support for encryption, connection interruption and inactivity probe

# **Environmental Specifications**

- ➤ Operating temperature range: 0°C to 50°C (32°F to 122°F) 0°C to 45°C (32°F to 113°F) if using 100G QSFP28 modules Derated by 1°C per 305 meters (1,000 ft)
- ➤ Storage temperature range: -25°C to 70°C (-13°F to 158°F)
- Operating relative humidity range: 5% to 90% non-condensing
- Storage relative humidity range: 5% to 95% non-condensing

Operating altitude: 3,050 meters maximum (10,000 ft)

#### **Electrical Approvals and Compliances**

- ► EMC: EN55032 class A, FCC class A, VCCI class A
- ► Immunity: EN55024, EN61000-3-levels 2 (Harmonics), and 3 (Flicker)

#### Safety

- ► Standards: UL60950-1, CAN/CSA-C22.2 No. 60950-1-03, EN60950-1, EN60825-1, AS/NZS 60950
- ► Certification: UL. cUL. TUV

#### **Restrictions on Hazardous Substances** (RoHS) Compliance

- ▶ EU RoHS compliant
- ► China RoHS compliant

#### **Physical Specifications**

RFC 2711 IPv6 router alert option

RFC 3484 Default address selection for IPv6

RFC 3587	IPv6 global unicast address format	RFC 4560	Definitions of managed objects for remote ping,	IFFF 802 3	adStatic and dynamic link aggregation
RFC 3596	DNS extensions to support IPv6	111 0 1000	traceroute and lookup operations	RFC 5798	Virtual Router Redundancy Protocol version 3
RFC 4007	IPv6 scoped address architecture	RFC 6527	Definitions of managed objects for VRRPv3		(VRRPv3) for IPv4 and IPv6
RFC 4193	Unique local IPv6 unicast addresses				,
RFC 4213	Transition mechanisms for IPv6 hosts and	Multica	st Support	Routing	Information Protocol (RIP)
	routers		outer (BSR) mechanism for PIM-SM	RFC 1058	Routing Information Protocol (RIP)
RFC 4291	IPv6 addressing architecture	IGMP query		RFC 2080	RIPng for IPv6
RFC 4443 RFC 4861	Internet Control Message Protocol (ICMPv6)		ing (IGMPv1, v2 and v3)	RFC 2081	RIPng protocol applicability statement
RFC 4862	Neighbor discovery for IPv6 IPv6 Stateless Address Auto-Configuration		ing fast-leave multicast forwarding (IGMP/MLD proxy)	RFC 2082	RIP-2 MD5 authentication
111 0 4002	(SLAAC)		ng (MLDv1 and v2)	RFC 2453	RIPv2
RFC 5014	IPv6 socket API for source address selection	PIM for IPv6		Coourit	v Footures
RFC 5095	Deprecation of type 0 routing headers in IPv6	PIM SSM fo		SSH remote	y Features
RFC 5175	IPv6 Router Advertisement (RA) flags option	RFC 1112	Host extensions for IP multicasting (IGMPv1)	SSLv2 and	ŭ
RFC 6105	IPv6 Router Advertisement (RA) guard	RFC 2236	Internet Group Management Protocol v2		ccounting and authentication (AAA)
			(IGMPv2)		( authentication protocols (TLS, TTLS, PEAP
Manage		RFC 2710	Multicast Listener Discovery (MLD) for IPv6		and MD5)
	d SNMP traps	RFC 2715	Interoperability rules for multicast routing		multi-supplicant authentication
AT Enterpris Optical DDN		RFC 3306	protocols Unicast-prefix-based IPv6 multicast addresses		( port-based network access control
SNMPv1, v2		RFC 3376	IGMPv3	RFC 2818	HTTP over TLS ("HTTPS")
,	B Link Layer Discovery Protocol (LLDP)	RFC 3810	Multicast Listener Discovery v2 (MLDv2) for	RFC 2865 RFC 2866	RADIUS authentication
RFC 1155	Structure and identification of management		IPv6	RFC 2868	RADIUS accounting RADIUS attributes for tunnel protocol support
	information for TCP/IP-based Internets	RFC 3956	Embedding the Rendezvous Point (RP) address	RFC 3280	Internet X.509 PKI Certificate and Certificate
RFC 1157	Simple Network Management Protocol (SNMP)		in an IPv6 multicast address	0 0200	Revocation List (CRL) profile
RFC 1212	Concise MIB definitions	RFC 3973	PIM Dense Mode (DM)	RFC 3546	Transport Layer Security (TLS) extensions
RFC 1213	MIB for network management of TCP/IP-based	RFC 4541	IGMP and MLD snooping switches	RFC 3579	RADIUS support for Extensible Authentication
DEO 1015	Internets: MIB-II	RFC 4601	Protocol Independent Multicast - Sparse Mode		Protocol (EAP)
RFC 1215	Convention for defining traps for use with the SNMP	RFC 4604	(PIM-SM): protocol specification (revised) Using IGMPv3 and MLDv2 for source-specific	RFC 3580	IEEE 802.1x RADIUS usage guidelines
RFC 1227	SNMP MUX protocol and MIB	111 0 4004	multicast	RFC 3748	PPP Extensible Authentication Protocol (EAP)
RFC 1239	Standard MIB	RFC 4607	Source-specific multicast for IP	RFC 4251 RFC 4252	Secure Shell (SSHv2) protocol architecture Secure Shell (SSHv2) authentication protocol
RFC 1724	RIPv2 MIB extension			RFC 4253	Secure Shell (SSHv2) transport layer protocol
RFC 2578	Structure of Management Information v2	Open SI	nortest Path First (OSPF)	RFC 4254	Secure Shell (SSHv2) connection protocol

 <sup>&</sup>lt;sup>1</sup> 64 OSPF and BGP routes included in base license
 <sup>2</sup> MACSec only operates on the XEM2-12XS expansion modules
 <sup>3</sup> 5 APs can be managed for free. Add an additional 40, 80, 120 or 180 APs with an AWC license
 <sup>4</sup> Both an AWC-CB license and an AWC license are required for Channel Blanket to operate. This feature is supported by TQ5403 and TQ5403e

#### **Ordering Information**

#### AT-x950-28XSQ-B0v5,6

24-port 1/10G SFP/SFP+ stackable switch with 4 x 40G/100G QSFP+/QSFP28 ports, a XEM bay, and dual hotswap PSU and Fan bays

#### AT-x950-28XTQm-B0y5,6

24-port 1/2.5/5/10G copper stackable switch with 4 x 40G/100G QSFP+/QSFP28 ports, a XEM bay, and dual hotswap PSU and Fan bays

### AT-FAN05-B0v<sup>5</sup>

Spare hot-swappable fan module

### AT-PWR600-BXy<sup>5, 6, 7</sup>

600W AC system power supply

#### AT-XEM2-8XSTm-B0y5

4 x 1/2.5/5/10G RJ45 ports and 4 x 1G/10G SFP+ ports

# AT-XEM2-12XTm-B0y5

12 x 1/2.5/5/10G RJ45 ports

#### AT-XEM2-12XT-B0y5

12 x 100M/1G/10G RJ45 ports

#### AT-XEM2-12XS-B0y5

12 x 1G/10G SFP+ ports

#### AT-XEM2-4QS-B0v5

4 x 40G QSFP+ ports

#### AT-XEM2-1CQ-B0y5

1 x 100G QSFP28 port

#### **Accessories**

## 100G QSFP28 Modules

#### AT-QSFP28-SR4

100GSR 850nm short-haul up to 100 m with MMF

#### AT-QSFP28-LR4

100GLR 1310nm medium-haul, 10 km with SMF

# AT-QSFP28-1CU

1 meter QSFP28 direct attach cable

# AT-QSFP28-3CU

3 meter QSFP28 direct attach cable

#### 40G QSFP+ Modules

# AT-QSFP1CU

1 meter QSFP+ direct attach cable

# AT-QSFP3CU

3 meter QSFP+ direct attach cable

#### AT-QSFPSR4

40GSR4 850 nm short-haul up to 150 m with MMF, MPO-12

# AT-QSFPSR4LC

40GSR4 850 nm short-haul up to 150 m with MMF, LC

#### AT-QSFPLR4

40GLR4 1310 nm medium-haul, 10 km with SMF

#### AT-QSFPER4

40GER4 1310 nm long-haul, 40 km with SMF

#### AT-MTP12-1

1 meter MTP optical cable for AT-QSFPSR

#### AT-MTP12-5

5 meter MTP optical cable for AT-QSFPSR

# Breakout Cables

For 4 x 10G connections

# AT-QSFP-4SFP10G-3CU

QSFP to 4 x SFP+ breakout direct attach cable (3 m)  $\,$ 

# AT-QSFP-4SFP10G-5CU

QSFP to 4 x SFP+ breakout direct attach cable (5 m)

#### 10GbE SFP+ Modules

#### AT-SP10SR

10GSR 850 nm short-haul, 300 m with MMF

#### AT-SP10SR/I

10GSR 850 nm short-haul, 300 m with MMF industrial temperature

#### AT-SP10LRM

10GLRM 1310 nm short-haul, 220 m with MMF

#### AT-SP10LR

10GLR 1310 nm medium-haul, 10 km with SMF

# AT-SP10LR/I

10GLR 1310 nm medium-haul, 10 km with SMF industrial temperature

#### AT-SP10LR20/I

10GER 1310nm long-haul, 20 km with SMF industrial temperature

#### AT-SP10ER40/I

10GER 1310nm long-haul, 40 km with SMF industrial temperature

## AT-SP10ZR80/I

10GER 1550nm long-haul, 80 km with SMF industrial temperature

#### AT-SP10T

10GBase-T 20 m copper8

#### 10GbE SFP+ Cables

#### AT-SP10TW1

1 meter SFP+ direct attach cable

#### AT-SP10TW3

3 meter SFP+ direct attach cable

#### AT-SP10TW7

7 meter SFP+ direct attach cable

### 1000Mbps SFP Modules

#### AT-SPSX/I

1000SX GbE multi-mode 850 nm fiber up to 550 m industrial temperature

#### AT-SPTX

1000T 100 m copper

#### AT-SPSX

1000SX GbE multi-mode 850 nm fiber up to 550 m

#### AT-SPEX

1000X GbE multi-mode 1310nm fiber up to 2 km

#### AT-SPLX10

1000LX GbE single-mode 1310 nm fiber up to 10 km

#### AT-SPLX10/I

1000LX GbE single-mode 1310 nm fiber up to 10 km industrial temperature  $\,$ 

#### AT-SPBD10-13

1000LX GbE Bi-Di (1310 nm Tx, 1490 nm Rx) fiber up to 10 km  $\,$ 

# AT-SPBD10-14

1000LX GbE Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 10 km  $\,$ 

# AT-SPBD20-13/I

1000BX GbE Bi-Di (1310 nm Tx, 1550 nm Rx) fiber up to 20 km  $\,$ 

# AT-SPBD20-14/I

1000BX GbE Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 20 km  $\,$ 

#### AT-SPBD40-13/I

1000LX GbE single-mode Bi-Di (1310 nm Tx, 1490 nm Rx) fiber up to 40 km, industrial temperature

# AT-SPBD40-14/I

1000LX GbE single-mode Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 40 km, industrial temperature

# AT-SPLX40

1000LX GbE single-mode 1310 nm fiber up to 40 km  $\,$ 

# AT-SPZX80

1000ZX GbE single-mode 1550 nm fiber up to 80 km  $\,$ 

# AT-SPZX120/I

1000ZX GbE single-mode 1550 nm fiber up to 120 km industrial temperature
